### How to Use Themes for Flashcards

For the agrarian revolution, there are several themes an explanation could fit with. Remember you only have to do 1 theme per term. I have given 3 examples below to show you how to link the term to the questions in order to give a written connection to the theme.

- Theme 2/Question 3: How were scientific/technological innovations adapted and transformed as they spread from one society/culture to another.

Connection should answer: How did the agrarian revolution use scientific/technological innovations to adapt and transform society/culture?

- Theme 4/Question 2: How have different labor systems developed and changed over time?

Connection should answer: How did the agrarian revolution change the type of labor system being used.

- Theme 5/Question 2: How, by whom, and in what ways have social categories, roles, and practices been maintained or challenged over time?

Connection should answer: How did the agrarian revolution maintain or change gender roles and social practices and why?
